
DC power units from Sweden

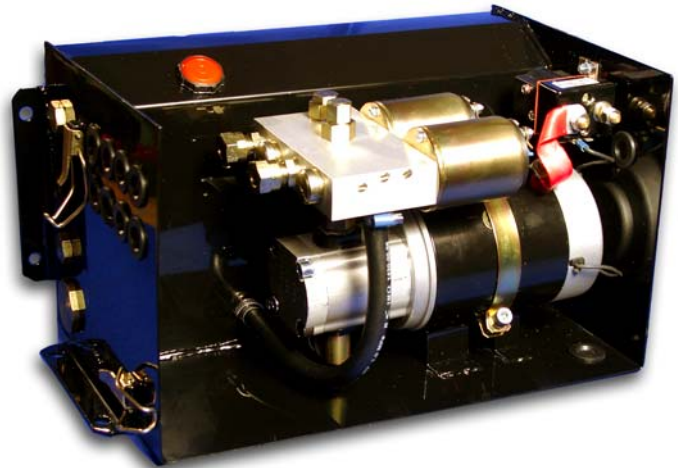

We manufacture power units for rugged conditions with reliable components.

applications:

- *tail gate lifts*
- *loading cranes*
- *light tippers*
- *steering axis*
- *and many more*

Your alternative from Sweden

The company

Hydraulfunktion AB from Ljungby in southern Sweden is a manufacturer of hydraulic components and hydraulic power units.

Our modular system covers a wide range of applications. We also construct custom made power units after your specific demands.

The HF concept

- *short delivery time
(power units: 1 to 2 weeks)
(components: from stock)*
- *flexible modular system for a wide range of applications*
- *customer specific production with short delivery time*
- *compatible to market and industry standards, for convenient spare part supplies*

Power units for Nordic conditions

The HF hydraulic power units have been developed for the specific demands of the Nordic climate and environment.

Solid construction for rugged conditions.

**HF
power Packs**

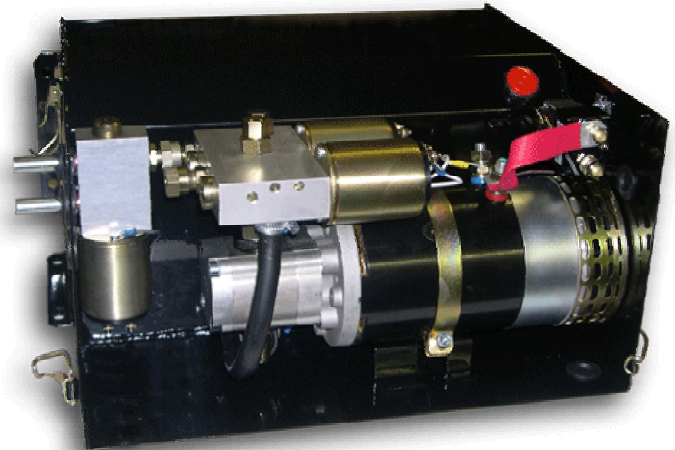

for mobile hydraulics

product range

DC power units

HF manufactures hydraulic power units for the vehicle industry and material handling.

- *leakage free seat valves*
- *low noise gear pumps*
- *highly efficient dc motors*
- *packs for rugged conditions*
- *modular system covers a wide range of applications*

DC electro pumps

HF electro pumps are compact and for multi purpose use

- *high operating pressure*
- *compact dimensions*
- *long lifetime and service friendly*
- *high efficiency*
- *available with control and directional valves*
- *for intermitted operating (S1, S2 and S3 ratings available)*
